Backlog

Show Project Description

In Progress

Write code to store and retrieve list information when a user logs in.

DK

R6 Front End - Manage List Page:
Make a new predefined list on the list manage page called Grocery List

HZ

R6 Front End - Recipe Page: Add button that says "Add to Grocery List"

HZ

R3 Front End - Add a button for users to go from one page to another

HZ

Back End - Start integrating MySQL

he

R8 Front End - Adding a slot on the search page that says "Radius"

DK

R3 Front End - Paginate each 10 results

HZ

R6 Front End - Have the Grocery List page display the ingredients from recipes a user specifies

HZ

R3 BlkBox Test - Check that a maximum of 10 results are shown

R3 BlkBox Test - Check that there is no pagination for less than 10 results

R3 BlkBox Test - Check that returning to an older page shows the same results it showed earlier

R3 BlkBox Test - Check that the different results are displayed on different pages

R3 BlkBox Test - Check that the user can go to different pages of results

R6 BlkBox Test - Test that adding a recipe to the list displays the grocery list

R6 BlkBox Test - Adding a recipe twice doesn't show the ingredients twice

R8 BlkBox Testing - Check non-positive non-integer values for Radius

R8 BlkBox Testing - Check querying

with no Radius

R8 BlkBox Testing - Check that results page only displays restaurants within the given radius

R8 WhtBox Testing - Check that the results page is set to display only the restaurants within the given radius

Completed

Get a working copy of the I'm Hungry Program

Back End - Start implementing login functionality

R1 Back End - Create schema for database that will store user's list contents and grocery list

R8 Back End - Modifying the restaurant search to stop once outside the radius

R6 Back End - Implement adding a recipe's ingredients to the grocery list

✓ R6 WhtBox Test - Testing the "Add to Grocery List" function

✓ R8 WhtBox Testing - Check that the Search bar only takes in positive integer values for Radius

✓ R6 WhtBox Test - Making sure the correct items are added to the Grocery List
